## A TABULAR CHECK-LIST OF CADDISFLIES (INSECTA: TRICHOPTERA) OF THE RUSSIAN FAR EAST

**I.M. Levanidova,<sup>1)</sup> T.S. Vshivkova,<sup>1)</sup> T.I. Arefina,<sup>1)</sup>  
I.A. Zasypkina<sup>2)</sup>**

1) *Institute of Biology and Pedology, Vladivostok-22, 690022, Russia*

2) *Institute of Biological Problems of North, Magadan, 685010, Russia*

The tabular check-list including 360 species from 24 families and 106 genera of caddisflies and distribution of the species through Russian Far East is given.

KEY WORDS: Trichoptera, caddisflies, fauna, Russian Far East.

**И.М. Леванидова,<sup>1)</sup> Т.С. Вшивкова,<sup>1)</sup> Т.И. Арефина,<sup>1)</sup>  
И.А.Засыпкина.<sup>2)</sup> Фаунистический список ручейников  
(Insecta: Trichoptera) Дальнего Востока // Дальневосточный  
энтомолог. 1995. N 16. С. 1-19.**

Приведен список 360 видов дальневосточных ручейников из 24 семейств и 106 родов с указанием распространения в пределах административных районов Дальнего Востока.

1) Биолого-почвенный институт, Дальневосточное отделение Российской Академии Наук, Владивосток-22, 690022, Россия.

2) Институт биологических проблем Севера, Дальневосточное отделение Российской Академии Наук, Магадан, 685010, Россия.

## INTRODUCTION

Basic knowledge of caddisflies fauna of the Russian Far East associated with the famous Russian expert in Trichoptera A.V. Martynov. He investigated caddisflies from different regions of eastern part of Russia and summarized the references (Martynov, 1909-1936). Immature stages of Russian caddisflies as their distribution have been studied by S.G. Lepneva (1964, 1966).

Many efforts for study of Trichoptera fauna of Russian Far East have been made by I.M. Levanidova (1960-1989; Levanidov & Levanidova, 1976; Levanidova et al., 1977-1989; Botosaneanu & Levanidova, 1987-1988; Mey & Levanidova, 1989; Levanidova et al., in press).

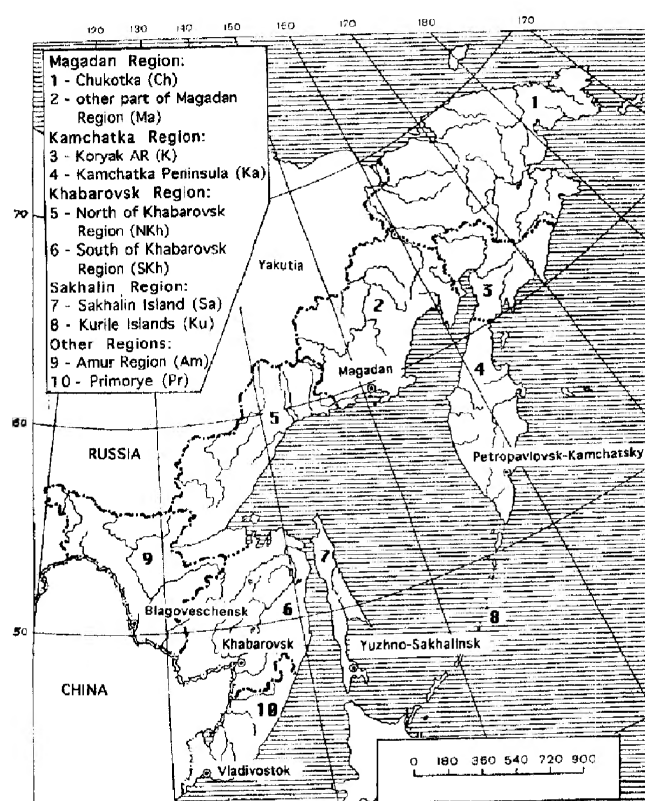

Fig. 1. Map of the Russian Far East.

The study of caddisflies was continued by new generation of Russian scientists (Arefina, 1994; Ivanov & Levanidova, 1993; Lukyanchenko, 1993; Makarchenko et al., 1980; Potikha, 1987; Streletzkaya, 1972; Vshivkova, 1977-1995; Vshivkova, in press; Vshivkova et al, in press; Zasyapkina, 1975-1991; Zasyapkina & Zasyapkin, 1991; Zasyapkina et al, in press), as with cooperatioon with foreign researchers (Botosaneanu, 1993; Ito et al., 1992-1994; Mey, 1991-1992; Morse et al., in press; Nagayashi & Ito, 1993; Schmid et al., 1986-1993; Tanida, 1993; Vshivkova et al., 1994; Vshivkova & Tanida, 1985). The catalogue of the USSR Trichoptera has been published by Z.Spuris (1989).

Current check-list of the caddisflies of the Russian Far East is based on the references mentioned above. We follow the arrangement of families by Neboiss (1991), and genera and species are arranged alphabetically within each family. Synonymy is given in special cases only. A map of the Russian Far East with abbreviations of regions is given on Fig.1.

Several symbols appear in the tables: K - indicates species which are found only in Koryak AR of Kamchatka Region; L - indicates species which are found only in larvae phase on the territory of concrete region; (+) - indicates data need reexamination.

#### LIST OF THE CADDISFLIES OF THE RUSSIAN FAR EAST

## DISCUSSION

The list of caddisflies of Russian Far East includes 360 species from 24 families and 106 genera. The fauna of Chukotka includes 28 genera from 12 families; other part of Magadan Region - 34 genera from 14 families. Kamchatka Region accounts of 33 genera from 11 families, Rhyacophilidae not founded in this region. The fauna of the south part of Khabarovsk Region (63 genera from 21 families) more rich than one of the north part of Khabarovsk Region (22 genera from 11 families). The fauna of Amur Region is less investigated and includes 41 genera from 16 families. The richest caddisfly fauna is known from Primorskii krai: 92 genera from 24 families. The same 20 families of caddisflies are listed for Sakhalin and Kurile Islands but they are represented by 56 genera in Sakhalin and 44 genera in Kuriles.

## ACKNOWLEDGEMENTS

We wish to express our sincere thanks to Drs. L.Botosaneanu (Zoological Museum, Amsterdam, The Netherlands), O.Flint (Smithsonian Institution, Washington, USA), T.Ito (Hokkaido Fish Hatchery, Japan), R.Kuranishi (Natural History Museum and Institute of Chiba, Japan), W.Mey (Museum für Naturkunde der Humboldt-Universität Berlin, Germany), Jh.Morse (Clemson University, South Carolina, USA), A.Nimmo (University of Alberta, Canada), T.Nozaiki (Environmental Research Center of Kanagawa Prefecture, Japan), F.Schmid (Centre de la Recherche sur les Terres et les Ressources biologiques,

Ontario, Canada), K.Tanida (University of Osaka Prefecture, Japan), G.Wiggins (Royal Ontario Museum, Toronto, Canada), L.Yang (Nanjing Agricultural University, China) for kind help in our research. We are most grateful to Drs. A.Lelei and S.Storozhenko for critical reading of the manuscript.

Natural History Museum and Institute of Chiba (Chiba, Japan) is the sponsor of the publication of this paper.

## INFORMATION

Far Eastern Entomologist is a journal publishing original papers on entomology, including taxonomy, systematic, morphology, phylogeny, as well biology, ecology and biogeography. Reviews, comprehensive or revisionary studies of the insects throughout East Asia are especially welcome and will be given first priority for publication. Faunistic papers based on materials from the Russian Far East may be submitted also.

Inquiries regarding content, subscription, manuscripts and copies should be sent to editor: S.Yu.Storozhenko, Institute of Biology and Pedology, Vladivostok-22, Russia.

Журнал "Дальневосточный энтомолог" публикует оригинальные статьи по систематике, морфологии, филогении, зоогеографии, биологии и экологии насекомых. Особое предпочтение отдается первоописаниям, ревизиям отдельных таксонов и обзорным статьям по Восточной Азии. Также могут быть опубликованы фаунистические статьи по Дальнему Востоку России и сопредельным странам.

По вопросам оформления рукописей и подписки просим обращаться по адресу: Россия, 690022, Владивосток-22, Биолого-почвенный институт ДВО РАН, С.Ю. Стороженко.
